

# A Personal Construct Study of Peer Influence and Self-Presentation in Drug Abusing Youth: Implications for Youth Mental Health Service

朋輩影響與濫藥青少年自我概念的研究：  
對青少年精神健康服務的建議

Keith Wong, Ph.D.  
October 11, 2014  
Richmond Fellowship of  
Hong Kong

## 香港濫藥青少年的趨勢 (21歲以下) (禁毒處, 2014)

## 青少年濫藥的三大原因 (禁毒處, 2014)

Peer influence 朋輩影響	51.3 %
Relief of boredom & stress 解悶減壓	43.6 %
Curiosity 好奇心	39.4 %

- Given peer influence is reported as the primary reason for drug use, hence, focus of study

# 背景及理念 Background

- 青少年濫藥日漸年輕化和多樣化(禁毒處, 2014)
- 朋輩影響為青少年濫藥的首要原因(51.3%)
- 青少年認為濫藥都關乎自我選擇和決定
- 自主決定(自我概念)與精神健康息息相關
  
- 因此這研究探討朋輩關係和自我概念對青少年濫藥的相互影響

# 研究目的 Research Objectives

What are the roles played by peers in affecting the presentation of self in drug abusing youth?

朋輩在影響濫藥青少年自我表現所扮演的角色

Research Questions (RQ):

RQ1: How do peers affect drug abusing youth's adoption of drug taking behaviours?

RQ2: What is the mental health status of these youth?

RQ3: How do drug abusing youth perceive themselves?

# 研究方法 Methodology

Ethnographic, Mixed-method approach:

- Nomothetic data for group profile
- Ideographic data for in-depth understanding of individual lives
- Examine the role of peers on self presentation in drug abusing youth from the **insider's perspective**

## 樣本 (目的性抽樣) Purposive Sampling

	Group A (N = 12)	Group B (N = 12)	Group C (N = 32)
Drug career phase 濫藥階段	Experimental drug users 試驗性用藥者	Active drug abusers 濫藥青少年	Drug abusers in rehabilitation 開始服康的青年
Recruitment of participants 招募參加者	Cheer Lutheran Centre 路得會青怡中心	Caritas Lok Heep Club 明愛樂協會	Caritas Wong Yiu Nam Centre 明愛黃耀南中心
Context of interview 訪談場境	Centre or Secondary school	Centre or participants' neighborhood	Residential Rehabilitation Centre

# 訪問程序 Procedures

## 第一節：Mental Health Scales 精神健康量表

General Health Questionnaire 一般健康量表

Hopelessness Scale 絕望感量表

Purpose in Life 人生目的量表

Rosenberg Self-esteem 自尊心量表

Father-Adolescent and Mother-Adolescent Conflict Scales

爸媽與青少年衝突量表

## 第二節：Repertory Grid Method 個人構念稱儲格

## 第三節：Semi-structured Individual Interview 個人訪談

# 受訪者背景

## Participants' demographics

- Mean age: 17 years
- Mean years of schooling: 9 years (中三)
- Mean age of first drug use: 15 years
- Average length of drug use: 2.5 years

Sample matches closely characteristics of young drug abusers reported in CRDA

# 受訪者精神健康

## Participants' Mental Health

	Group A	Group B	Group C
GHQ 一般健康 (A>B>C)	64.25	63.42	52.38
Hopelessness 絕望量表 (B>A>C)	63.33	68.50	54.97
Purpose in Life 人生目的量表 (C>A>B)	82.42	74.17	92.94
Self-esteem 自尊心量表 (B>A>C)	23.08	24.58	21.47

# 親子關係

## Parent-Adolescent Relationship

	Group A	Group B	Group C
父親與青年衝突量表 Father-Adolescent Conflict (B>A>C)	11.08	11.58	9.66
親與青年衝突量表 Mother-Adolescent Conflict (B>A>C)	6.67	7.17	5.34

# 濫藥青少年精神健康及親子關係

	Group A	Group B	Group C
精神健康 Mental Health	較差 Worse	最差 Worst	好 Good
親子關係 Parent-Adolescent Relationship	較差 Worse	最差 Worst	好 Good

# Kelly's (1955) Personal Construct Theory (PCT) 個人建構理論

## People as Scientists 人就像科學家

- Actively explore and experiment with the world
- Making hypothesis 假設, testing hypothesis based on past experience
- Validating 確定 or invalidating 否定 hypothesis
- Leading to social behaviours

## Central tenets:

- Constructive Alternativism
- “All of our present interpretations of the universe are subject to **revision** or **replacement**” (pp. 15)

# PCT's Fundamental Postulate

“A person’s processes are psychologically channelized by the ways in which he **anticipates** events” Kelly’s (1955, pp.46)

Personal Construct System –

Bipolar constructs in hierarchical structure based on similarities or differences between a person and other people in social context

Relevant Corollaries	Personal Construct Theory	Layman concepts
Choice 選擇原則 (Kelly, 1955, pp. 64)	A person chooses for himself that <b>alternative</b> in a dichotomized construct through which he or she anticipates the greater possibility for <b>extension</b> and <b>definition</b> of his or her system	Personal agency 個人自主
Commonality 共同原則 (Kelly, 1955, pp. 90)	To the extent that one person employs a <b>construction of experience</b> which is <b>similar</b> to that employed by another, his psychological processes are similar to those of the other person	Empathy 同理心
Sociality 社交原則 (Kelly, 1955, pp. 95)	To the extent that one person construes the construction processes of another, he may play a <b>role in a social process</b> involving the other person	Individual role in social context 個人在社交場境的角色

# 濫藥者的自我概念

Norris and Maklouf-Norris' (1976) concept of  
“Community of Selves” 自我群體

## Self-Identity System 自我身份系統

Actual Self 現在的我	Representation of the person now
Social Self 別人眼中的我	Representation of how other people see the person
Ideal Self 理想的我	Representation of a person's desired aims
Drug Self 濫藥的我	Representation of the person in drug use

## 提供的元素 Supplied Elements

A	而家的我	Actual Self
B	「High」嘢時的我	Drug Self
C	人哋眼中的我	Social Self
D	理想的我	Ideal Self
E	媽媽或親如媽媽的人	Mother or Surrogate Mother
F	爸爸或親如爸爸的人	Father or Surrogate Father
G	女朋友	Girl Friend
H	最好的朋友	Best Friend
I	「High」嘢的朋友圈子	Drug-taking Peer Group
J	對我影響大的人	Influential Person

## 受訪者C11的個人建構

	Emergent Pole	Contrast Pole
1	文靜	風趣
2	冷靜	魯莽
3	潮流	古板
4	勤力	懶惰
5	專心工作	貪玩
6	上進心	懶散
7	認真	跳皮
8	溫柔	粗魯
9	勤力向上	追求享受
10	孝順	反叛

# 受訪者C11個人構念稱儲格

相似	A. 而家的我	B. 理想的 我	C. 人地眼 中的我	D. High 嘢 時的我	E. 媽媽	F. 爸爸	G. 女朋友 (文文)	H. 最好的 朋友 (豪仔)	I. 老表 (圈子)	J. 最影響我 的人 (大家姐)	不同
1.風趣	3	1	2	2	5	6	4	1	2	3	文靜 AHG
2.魯莽	5	5	3	2	5	3	5	3	2	4	冷靜 ADI
3.潮流	2	2	2	1	5	6	2	2	1	3	古板 AIF
4.勤力	4	2	4	6	1	1	3	3	4	2	懶惰 AEF
5.貪玩	3	6	3	2	6	6	3	3	2	6	專心工作 AGJ
6.上進心	3	1	4	5	2	2	3	4	6	2	懶散 AJI
7.跳	4	4	3	1	5	6	3	1	2	5	認真 ADH
8.溫柔	3	3	4	5	2	5	2	4	6	2	粗魯 AGI
9.追求享受	2	2	2	1	5	5	2	2	1	3	勤力向上 AFH
10.孝順	2	1	3	5	1	2	4	4	6	2	反叛 AEI

# A Graphical Plot of Elements in Construct Space

## 受訪者C11 (age 16)

X-axis: Component 1  
Y-axis: Component 2  
The letters refer to the elements  
The figures being the constructs

# 自我概念的表現

## Presentation of Four Aspects of Self

	Group A	Group B	Group C
現在的我 Actual Self (C>A>B)	Positive	Least Positive	Most Positive
濫藥的我 Drug Self (C<B<A)	Least Negative	Negative	Most Negative
別人眼中的我 Social Self (C>B>A)	Least Positive	Positive	Most Positive
理想的我 Ideal Self (B>C>A)	Least Positive	Most Positive	Positive

Drug-taking participants  
(Group A & B) 濫藥的受訪者

Participants in Rehabilitation  
(Group C) 復康的受訪者

Emergence of Drug Self

Invalidation of Drug Self

Suppression of Actual Self

Strengthening of Actual Self

Enhancement of Social Self by  
drug-taking peers

Enhancement of Social Self by  
drug-free peers

Distancing of Ideal Self

Promotion of Ideal Self

Less Positive Mental Health

More Positive Mental Health

Poorer Relationship with Parents

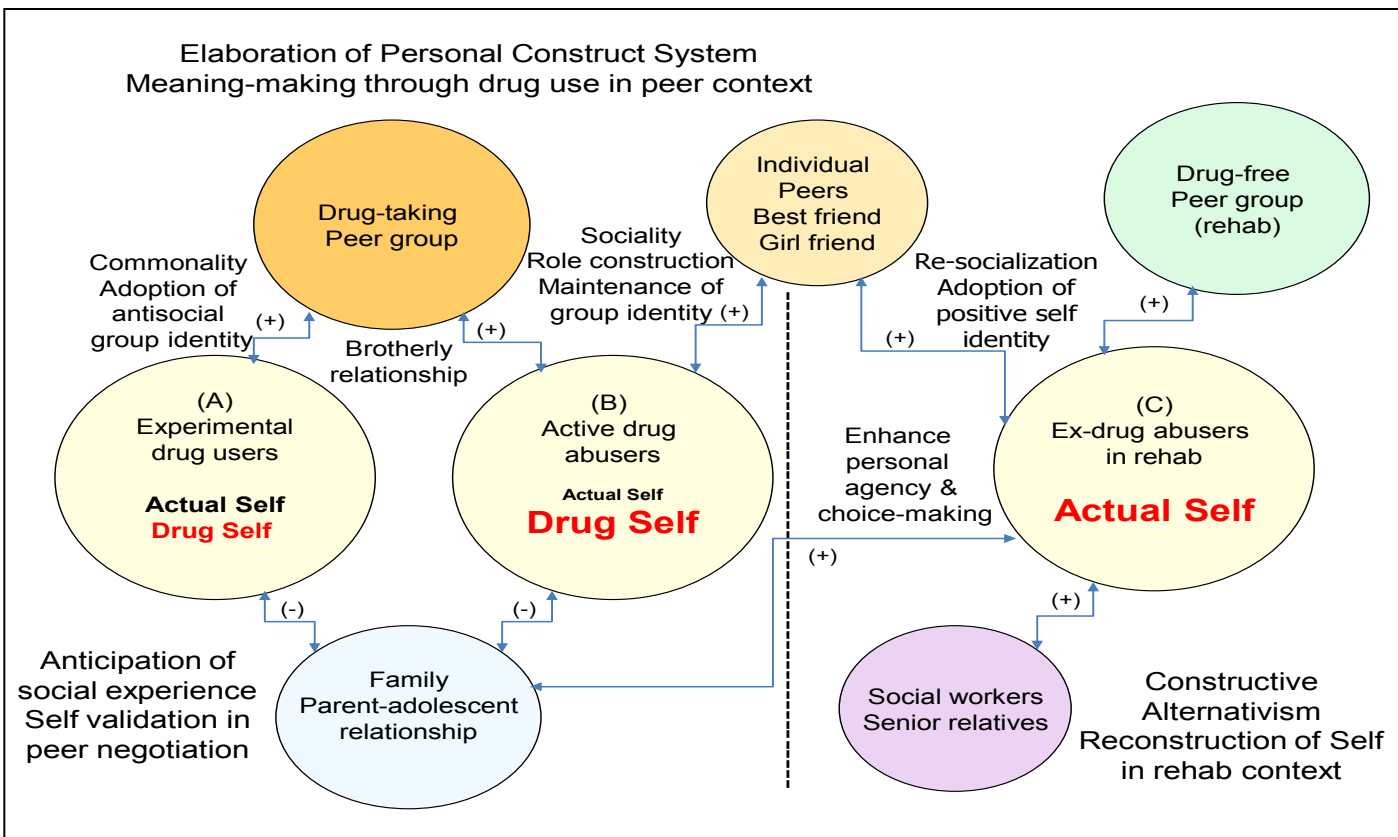

Better Relationship with Parents

# 主要研究結果

## Summary of Findings

- 朋輩關係對濫藥青少年有重大影響
- 濫藥青少年建立反社會的群體身份
- 濫藥青少年的精神健康不太好
- 青少年自我概念和行為在不同社交場境有不同的表現
- 因此建議用正面朋輩影響和增強個人自主力

# 濫藥青少年的朋輩影響和自我概念的後現代建構演譯

Thank you!
